

**\*\*\*DRAFT\*\*\*DRAFT\*\*\*DRAFT\*\*\***

**Cranberry Public-Private Partnership**

**Axiom's commitments:**

- To commit between 10-15% of the capital cost to build the network
- Strong federal, state, local and foundation connections with a track record to attract those resources to accomplish the community's goals
- A commitment to contributing 5% of profits, once the network is fully built, into a Community Technology Fund, that would be used to accomplish mutually agreed upon goals
- A commitment to the community to reevaluate technology equipment every three years
- Three months of Digital Literacy at our expense, during the build out
- Potentially add additional Community Hotspots, Digital Literacy classes and other resources at our expense or through the Technology Fund and other funding sources as they are identified
- Build infrastructure to help the community reach 21<sup>st</sup> Century connectivity and maintain that infrastructure in perpetuity
- Partnership with University of Maine (UMO) on interns, to provide community outreach persons seeking feedback; this will give the Cranberry Isles and Axiom the opportunity to measure performance, community feedback and overall value to the community.

**Cranberry Isles commitments:**

- Commit to identifying funding sources that would cover a % of build cost
- Creating a yearly funded Technology Fund for the next 10 years
- Working with Axiom to identify community barriers to deployment
  - Creating, in perpetuity, right of way access and right of first refusal for mutually agreed upon plans for deployment
- Working to address any code enforcement barriers to deployment
- Become a champion of Axiom by leveraging community assets (like website) to help promote customer take rate and Axiom community involvement
- A commitment to Axiom to resource new equipment as mutually agreed upon to keep equipment upgraded to current standards
- Understanding that this build out of fiber will require a community effort
